PHYSICAL CHEMISTRY SEMINARS

HILARY TERM 2026

(Convenors: Professors Benesch and Baldwin)

The following seminars will be held at 2 pm in the PTCL Lecture Theatre

Week 2	Professor Molly Stevens, DPAG, University of Oxford
(26.01.2026)	<i>"Designing new materials for healthcare applications using chemistry and chemical imaging"</i>
Week 4	Dr. Oliver Crook (Department of Chemistry and Kavli Institute of Nanoscience Discovery)
(09.02.2026)	<i>"Sculpting Proteins: using AI/ML to learn across scales"</i>
Week 6	Professor Barbora Špačková, Institute of Physics of the Czech Academy of Science
(23.02.2026)	<i>"Quantitative label-free imaging of protein diffusion and interaction at the single molecule level"</i>
Week 8	Dr. Zenon Toprakcioglu, University of Cambridge
(09.03.2026)	<i>"Proteins: Instigators of Neurodegeneration or Building Blocks for Biomaterials"</i>

Tea and coffee will be available in the PTCL Tea Room following each lecture

All welcome
